AMENDMENTS TO CLAIMS

1 to 10 (Cancelled).

1 11. (Currently Amended) A delivery system for endovascular devices,
2 comprising; a first sheath having a distal end and a proximal end and
3 containing at least a first expandable device at a proximal end;
4 a second sheath movable within the first sheath and having a respective
5 distal end and a respective proximal end, the respective proximal end
6 concluding distally of the first expandable device and containing a second
7 expandable device;
8 the first expandable device and the second expandable device being
9 separate and separately deliverable from the delivery system.
10 a first pusher associated with the first expandable device extending thereto
11 within the first and second sheathes from a first proximal control pusher
12 end exposed at the distal ends of the first and second sheathes; and
13 a second pusher associated with the second expandable device extending
14 thereto within the first and second sheathes from a second distal control
15 pusher end exposed at the distal ends of the first and second sheathes.

1 12. (Previously Presented) A delivery system for endovascular devices as
2 in Claim 11 wherein the first expandable device comprises an attachment
3 graft tube having proximal and distal end portions and defining a lumen
4 therethrough and further including an attachment stent extending
5 proximally from the proximal end portion.

1 13. (Previously Presented) A delivery system for endovascular devices as
2 in Claim 12 wherein the second expandable device comprises a contra-
3 lateral leg extension.
